FOREWORD

This year's publication, *Crime in the United States—1978*, is the 49th such annual document issued by the FBI on behalf of the law enforcement community. The information contained in this book is a social statement. In many respects it represents one of the darker sides of human behavior in this country and should not be taken lightly.

Since 1930, the FBI has been collecting crime-related statistics submitted voluntarily by the law enforcement agencies of this Nation. The great volume of information thus received is correlated periodically and published for the information of the American people and to provide law enforcement and other areas of the criminal justice community with both an insight to criminality throughout the United States and a sound basis for studies of criminal activity.

In the late 1960s, the severity of the crime problem caught the attention of the American people, as well as the Congress of the United States. The result was a concerted effort on the part of city, county, state, and Federal agencies to improve their crime-fighting capabilities. Massive sums of money have been infused into the criminal justice system during the past decade. Statistically, it appears that these remarkable efforts have not had the impact on the incidence of crime envisioned earlier in this decade. It is a matter of record, however, that the various elements of the criminal justice community have made great strides by improving their efficiency and professionalism. Studies exist which indicate that the educational levels and the requisite training of police officers have dramatically improved over the years, better preparing those empowered to enforce the law. Other studies document the changes and improvement for progress within other elements of the criminal justice community.

But delegation of this problem to law enforcement agencies, however professional, has not been enough. Unless we as citizens collectively and individually join the crusade against crime, the vast resources of our respective governments will apparently have little or no effect on this Nation's crime situation. A mere perusal of the statistics in this publication conceivably attests to that fact. There are many programs initiated at the community level by law enforcement agencies which actively solicit the support of the citizenry. It is now up to us to respond to this solicitation and work hand-in-hand with law enforcement if we are to make any inroads in this Nation's crime problem.

A handwritten signature in dark ink, which appears to read "William H. Webster". The signature is fluid and cursive, with a large, stylized "W" and "H".

Director

Crime Factors

The presence of crime in our Nation's communities is a serious concern not only of the law enforcement profession, but of society at large. Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. However, no definitive conclusions have yet been reached. Instead, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows:

- Density and size of community population and its surrounding area.
- Variations in composition of the population, particularly age structure.
- Stability of population with respect to transient factors.
- Economic conditions, including job availability.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of citizenry toward crime.
- Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on police statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. The reader is, therefore, cautioned against comparing statistical data of individual communities solely on the basis of their population size.

SECTION I

SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

Based on a cooperative effort by over 15,000 law enforcement agencies across the Nation, the Uniform Crime Reporting (UCR) Program provides periodic assessments of crime in the United States as measured by offenses coming to the attention of the law enforcement community. The Program's foremost objective is to produce a reliable set of criminal statistics for use in law enforcement administration, operation, and management. However, data emanating from the Program are widely utilized by other criminal justice professionals, legislators, and scholars who have an interest in the crime problem. Additionally, the statistics have historically provided the general public an indication of fluctuations in the level of crime in our society.

Historical Background

The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) initiated this voluntary national data collection effort in 1930. During that same year, the Congress of the United States authorized the Federal Bureau of Investigation (FBI) to serve as the national clearinghouse for statistical information on crime. Since that time, data have been obtained from law enforcement agencies throughout the Nation based on uniform classifications and procedures of reporting.

In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that come to the attention of law enforcement agencies, since these data were more readily available than any other reportable crime information. Seven offenses, because of their seriousness, frequency of occurrence, and likelihood of being reported to police, were selected to serve as an index for evaluating fluctuations in the volume of crime. These crimes, known as the Crime Index offenses, are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

To provide nationwide uniformity in the reporting of data, standardized definitions were adopted for all offenses. Such standardization was necessary to overcome the variations in definitions of criminal offenses in different sections of the country. Without regard for local statutes, reporting agencies are required to submit their data in accordance with the UCR definitions of offenses as set forth in Appendix II of this publication. Because of variances in punishment for the same offenses in different state codes, there is no possibility in a program such as this to distinguish between felony and misdemeanor crimes.

The Committee on Uniform Crime Records, IACP, continues to serve in an advisory capacity to the FBI concerning the operation of the UCR Program. In this connection, the IACP, through surveys of police records and crime reporting systems, plays an active and effective part. The National Sheriffs' Association (NSA) in June, 1966, established a Committee on Uniform Crime Reporting to serve in an advisory role to the NSA membership and the national UCR Program. This Committee actively encourages sheriffs throughout the country to fully participate in the Program.

Committees on Uniform Crime Reporting within state law enforcement associations are also active in promoting interest in the UCR Program, fostering widespread and more intelligent use of uniform crime statistics and lending assistance to contributors when the need exists.

Methods of Data Collection

Agencies contributing to the UCR Program are responsible for compiling and submitting their crime data in one of two means, either directly to the FBI or through their state UCR Programs. Those which submit directly to the FBI are provided, on an individual basis, continuing guidance and support from the national Program.

Presently, there are 45 operational state-level UCR Programs and others are in various stages of development. These Programs are very effective in producing increased coverage of law enforcement agencies due to state mandatory reporting requirements; providing more direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them; and through coordination efforts, making information more readily available for use at the state level. In addition, these state-level agencies have resulted in vastly more efficient operations at the national level.

With the development of a state UCR Program, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Instead, completed information from these agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to the national Uniform Crime Reports' standards, definitions, and information required. These requirements, of course, do not prohibit the state from collecting other statistical data beyond the national collection. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program efforts, the FBI continues its internal procedures of editing and reviewing individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement rec-

ords and crime reporting procedures. These training sessions are, of course, coordinated with the state agency. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

On a monthly basis, law enforcement agencies report the number of Crime Index offenses (murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft) that become known to them. A count of these crimes, which are also known as Part I offenses, is taken from records of all complaints of crime received by law enforcement agencies from victims, officers who discovered the infractions, or other sources.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in Part I is reported to the FBI whether anyone is arrested for the crime, the stolen property is recovered, or prosecution is undertaken. Additionally, each month law enforcement agencies report the total number of these crimes cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the physical arrest of an offender. The number of clearances which involved only the arrest of offenders under the age of 18; the value of property stolen and recovered in connection with Part I offenses; and detailed information pertaining to criminal homicide are also reported.

Arrest data, which include the age, sex, and race of persons arrested, are reported monthly for both Part I and Part II offenses, by crime category. Part II offenses, while excluding traffic violations, include all other crimes except those classified as Part I.

Various data on law enforcement officers assaulted or killed are collected on a monthly basis. Other law enforcement employee data, specifically the number of full-time sworn officers and other personnel, are reported as of October 31 of each calendar year.

Editing Procedures

Data reliability is a matter of high priority to the UCR Program. Each incoming report is examined not only for arithmetical accuracy but for deviations from the experiences of similar agencies or unusual

variations in crime levels as established by the reporting agency's previous submissions which may indicate errors.

Variations in reported crime levels and ratios may indicate possible incompleteness in reporting or changes in reporting procedures. Necessary arithmetical adjustments or noted deviations are brought to the attention of the submitting agency through correspondence. Not only are individual reports studied, but also, periodic trends for individual reporting units are prepared and evaluated. As a standard procedure, crime levels for each reporting agency are analyzed five times a year by the FBI. Any significant increase or decrease is made the subject of a special inquiry to the contributing agency, either directly or through its state Program. The communications containing these inquiries specifically direct attention to possible changes in records or reporting procedures. When it is found that crime reporting procedures are in part responsible for the difference in the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from the trend tabulations.

Variations from reporting standards which cannot be resolved may be brought to the attention of the Committee on Uniform Crime Records of the IACP. In turn, the Committee may designate a representative to make a personal visit and cooperatively assist the agency in authenticating records and reporting methods.

Regardless of the extent of the statistical editing processes used by the FBI, the accuracy of the data assembled under this Program depends primarily on the adherence of each contributor to the established standards of reporting. For this reason, the FBI is not in a position to vouch for the validity of individual agency reports.

Although the final responsibility for data submissions rests with individual law enforcement agencies, the UCR Program endeavors to maintain data validity not only through its editing practices, but also, by providing training seminars and instructional materials in UCR procedures. All contributing agencies are supplied with the *Uniform Crime Reporting Handbook* which outlines, in detail, procedures for classifying and scoring offenses. The Handbook illustrates and discusses the reporting forms, as well as the tally forms which facilitate the periodic tabulation of statistics.

In addition, the FBI conducts UCR seminars and workshops throughout the country for law enforcement personnel. National and state UCR Program personnel are utilized to enlist the cooperation of

new contributors and to explain the purpose of the Program and methods of assembling information for reporting. When reporting problems exist in the individual agencies and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the problem.

Since a good records system is essential for accurate crime reporting, the FBI makes available the *Manual of Police Records*, which can serve as a guide in the establishment of a sound law enforcement records system. The Manual is currently undergoing extensive revision and updated copies should soon be available to law enforcement agencies.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program Bulletins are utilized to explain revisions in the Program, as well as present information and instructional material. Newsletters are produced periodically as needs arise.

Reporting Area

The presentation of crime data by reporting areas is one method of analyzing the statistics submitted to the UCR Program. Nationwide, the United States is divisible by regions and geographic divisions. Further breakdowns by city size rely on population figures and proximity to metropolitan areas. The Program follows as closely as practical the definitions for geographical entities used by the Office of Federal Statistical Policy and Standards, United States Department of Commerce.

A Standard Metropolitan Statistical Area (SMSA), generally, is made up of a core city or cities with a combined population of 50,000 or more and the surrounding county or counties which share certain metropolitan characteristics. "Other cities" are those outside SMSAs, most of which are incorporated. For crime reporting purposes, rural areas are made up of the unincorporated portions of counties outside urban places and SMSAs. As a general rule, sheriffs, county police, and many state police report on crimes committed within the limits of the counties but outside cities, while local police report on crimes committed within the city limits (urban places).

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with populations less than 50,000 together with counties which are within an SMSA. In this context, the major core city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because

of the particular crime conditions which exist in these communities surrounding the Nation's largest cities.

During 1978, the law enforcement agencies active in the UCR Program represented 99 percent of the United States population living in the SMSAs, 96 percent of the population in other cities, and 94 percent of the rural population. When considering the national population, as estimated by the Bureau of the Census, the combined coverage accounted for 98 percent of the total.

More detailed information concerning the geographical entities used in this publication can be found in Appendix III.

The Crime Totals

Communities which do not submit crime reports to the UCR Program represent a relatively small percent of the total population. In each of the tabular presentations in this publication, the extent of population coverage represented by the data included is shown. The FBI conducts an ongoing effort to further increase the reporting areas.

Population Data

In computing crime rates by state, SMSA, geographic division and region, and the Nation, population estimates released by the Bureau of the Census on July 1, 1978, were used. Population estimates for individual cities and counties were prepared using special census reports, state sources and estimates, commercial sources, and interpolation where no other estimate was available. The estimated United States population increase in 1978 was 1 percent over 1977.

Offense Estimation

It is possible that a law enforcement agency would submit fewer than the solicited 12 months of offense reports. Tables 1 through 5 of this publication represent total crime in the United States; therefore, offense counts here are estimated for agencies which fail to submit complete reports for the year. Offense estimation occurs within each of three areas: Standard Metropolitan Statistical Areas, other cities, and rural areas. It is assumed that unreported portions of these areas have the same proportionate crime experience as that for which reports were received. Estimates for unreported areas are based on the reported crime experience of similar areas within a state.

Crime Trends

A further means of studying crime throughout the Nation is to examine trends. Percent change tabulations presented in this publication are homogeneous

to the extent that only figures for reporting units which have provided comparable data for the periods under consideration are included. National, geographic, and area trends are computed for 2 consecutive years. Exclusions from trend computations are made when figures from a reporting unit are obviously inaccurate for any period or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures.

The current year's reporting is the most complete in terms of volume. Valid 2-year trends in Uniform Crime Reports may be used to reasonably establish long-term trends. In addition, these year-to-year trends can be applied as the basis for reestimating the volume of crime and in reconstructing crime trends for prior years.

The most reliable reports available for the current year are found in the crime rate tables by state and Standard Metropolitan Statistical Area. Care should be exercised in any direct data comparisons with statistics in prior issues of *Crime in the United States*. Changes in the crime level may have been due in part to improved reporting or records procedures, redefinition of reporting areas, or other variables.

Recent Developments

In October, 1978, the United States Congress passed legislation mandating that arson be classified as a Part I, Crime Index offense in the UCR Program. To fulfill the mandate, the staff of the Program established liaison with members of the law enforcement, fire service, and insurance communities in order to design a collection form which would provide meaningful information to all concerned. UCR contributors have since commenced submitting data on all arson offenses coming to their attention.

In accordance with standard classifications established by the Office of Management and Budget for all Federal administrative reporting and statistical activities, the UCR Program will modify its collection of data concerning the age, sex, and race of persons arrested effective January 1, 1980. The material solicited concerning race will be condensed from the current categories to encompass only White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander. In addition, a collection of ethnic origin, i.e., Hispanic or not Hispanic, will be instituted. Information collected on arrests of persons under the age of 18 will also change slightly. New age breakdowns will be used to show the total number of arrests of persons under the age of 10 and those of persons aged 10 to 12.

Compliance with the new Federal standards regarding the collection of race and ethnicity data will also require modifications to the Supplementary Homicide Report (SHR). The same revised categories used on the Age, Sex, and Race of Persons Arrested form will be employed on the SHR to gather statistics on murder victims and offenders.

In the recent past, a number of the state UCR Programs have found it advantageous to modify their existing system of Uniform Crime Reports to a transactional or incident-based mode. Such a system, in many cases, enables the state agency to better meet the information needs of individual law enforcement agencies by collecting data using state statute terminology and then converting the information at the state level to national UCR format. In many states, this approach substantially lessens the reporting burden on individual agencies, and at the same time, provides locally oriented data for comparison within the state and externally with the Nation. Additionally, a much higher level of detail is captured from which state agencies are able to perform specific analyses upon request. While incident-based crime reporting may not be practical for all states, for many it could be a very desirable goal. Extreme caution is needed in the development of an incident-based crime reporting system to ensure the state agency undertaking such a project is thoroughly cognizant of standard UCR procedures and has demonstrated a proficiency in handling UCR data. It is necessary to coordinate the transition from the

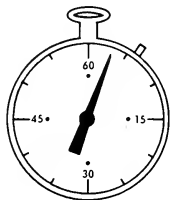

traditional or summary system of crime reporting to incident-based reporting with the national Program in order to ensure that both state and national information needs are addressed.

The fourth national State Uniform Crime Reporting Conference was held on June 25 — June 28, 1979, at the FBI Academy, Quantico, Virginia. Attendees included representatives from state UCR Programs and from law enforcement agencies developing Programs within their states; members of the Committee on Uniform Crime Records of the IACP and the Uniform Crime Reporting Committee of the NSA; representatives from the Law Enforcement Assistance Administration and IACP Headquarters; and members of the fire service community. Major topics of discussion were the collection of arson data and the revised categories for the gathering of statistics on race and ethnicity.

These conferences provide a forum atmosphere for the resolution of data collection problems which are national in scope. Further, the bringing together of those responsible for crime statistics collection within the states allows for an exchange of ideas.

The 1979 conference was exceptionally important since the UCR Program, for the first time in 49 years, is faced with a change in the basic structure of the Crime Index. The contributions made by various state UCR Program representatives were of inestimable value in giving the national Program direction in arson data collection strategies.

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II

CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as in all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

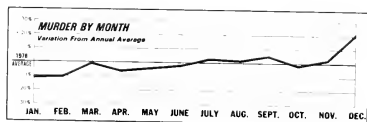

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	19,121	8.8
1978	19,555	9.0
Percent change	+ 2.3	+ 2.3

Volume

In the United States during 1978, there were an estimated 19,555 murders which represented approximately 2 percent of the total violent crimes.

A geographic breakdown of murder by region revealed that 42 percent of the murders occurred in the Southern States, which account for the largest regional population; 21 percent in the North Central States; 20 percent in the Western States; and 17 percent in the Northeastern States.

In 1978, December had a higher frequency of murder offenses than any other month of the year.

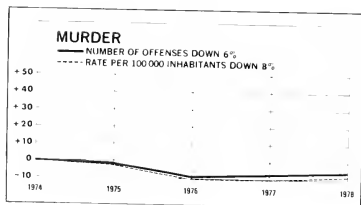

Trend

Nationally, the number of murders increased 2 percent from 1977 to 1978.

Regionally, the number of murder offenses in 1978 rose 5 percent in the Western States and 4 percent in the Southern States. The North Central States reported a 1-percent decrease, while the Northeastern States showed virtually no change.

Large core cities of 250,000 or more inhabitants and suburban areas experienced increases in the number of murders in 1978, 2 and 4 percent, respectively. In the rural areas the volume of murders was down 3 percent.

The following chart reveals a decline of 6 percent from 1974 to 1978 in the murder counts.

Rate

In 1978, there was an average of 9 murder victims for every 100,000 inhabitants in the Nation.

The number of murder victims in relation to population was highest in the Southern States with 12

murders per 100,000 inhabitants, a 3-percent increase over the previous year. The Western State rate was 10 per 100,000, a 2-percent rise over the 1977 rate. Both the North Central and Northeastern States experienced rates of 7 per 100,000 population; however, the North Central Region's rate represented a 1-percent decrease, while the Northeast's rate showed no change from the previous year.

Collectively, the SMSAs reported a murder rate of 10 victims per 100,000 inhabitants; the rural areas, a rate of 8 per 100,000 inhabitants; and cities outside metropolitan areas (Other Cities) reported a murder rate of 5 per 100,000 inhabitants.

Nature

To allow for a more detailed analysis of murder, the Uniform Crime Reporting Program collects supplemental information on this offense. Data are collected monthly on the age, sex, and race of murder victims and offenders; the types of weapons used in murders; the circumstances surrounding the offenses; and the relationships between victims and offenders.

As has consistently been the experience in recent years, murder victims were male in approximately 3 of every 4 instances in 1978. On the average, 54 of each 100 victims were white, 44 were Negro, and 2 were other races.

During 1978, 15,856 offenders were identified in connection with the murders of 14,279 victims. Most of the victims (13,329) were slain in single victim situations. Of these, 11,916 were killed by single offenders and 1,413 were murdered by multiple offenders. Concerning homicides involving multiple victims, 749 persons were killed by 322 offenders in incidents involving one assailant and multiple victims and 201 victims were slain by 215 offenders in multiple victim/multiple offender situations.

In 1978, firearms again predominated as the weapons most often used in the commission of murders throughout the Nation. The accompanying chart illustrates a breakdown by type of weapon used in murder offenses in the United States. In the Southern States, firearms were used in 70 percent of the murders; in the North Central States, 67 percent; in the Western States, 57 percent; and in the Northeastern States, 52 percent. Nationwide, 64 percent of the murders were committed through the use of firearms. Handguns were the weapons used in 49 percent of the total murders.

Cutting or stabbing instruments were used in 19 percent of the murders. The Northeastern States, where 1 of every 4 murders was committed with a

knife or cutting instrument, reported the most widespread use of such weapons. In 1 of every 5 murders in the Western States these types of weapons were employed, while the North Central and Southern States had the least incidence of use of such weapons, 1 of every 6 murders. Nationwide, other weapons such as blunt objects, poisons, explosives, etc., were used in 12 percent of the murders. In the remaining 6 percent, personal weapons such as hands, fists, and feet were used.

¹Because of rounding, percentages may not add to total.

The activities resulting in murder varied from arguments to felonies. That murder is largely a societal problem beyond the control of law enforcement is emphasized by the relationship of the murder victim to the offender.

Fifty-six percent of the murder victims in 1978 were acquainted with their assailants and 1 of every 5 victims was related to the offender. Nearly half of the murders resulted from arguments, while 17 percent

occurred as a result of felonious activity and 6 percent were suspected to be the result of some felonious act.

The accompanying table shows murder circumstances/motives for the past 3 years.

Murder Circumstances/Motives

1976-1978

²Murders committed during arguments while under influence of narcotics are not counted in felony murders.

Clearances

The clearance rate for murder in 1978 was higher than for any other Crime Index offense. Law enforcement agencies were successful in clearing 76 percent of the murders during the year, as compared to 75 percent in 1977. Only persons under 18 years of age accounted for 5 percent of the willful killings cleared by police in 1978.

Nationally, the clearance rate for murder between the years 1974 and 1978 declined from 80 percent to 76 percent.

Persons Arrested

In 1978, 43 percent of all persons arrested for murder were under age 25 and 9 percent were under 18. Arrests of youthful offenders under 18 years of age for murder decreased 18 percent during the period 1974-1978, and adult arrests for that offense fell 13 percent in the same period. The 18- to 22-year age group, accounting for 25 percent of the total arrests for murder, showed the heaviest involvement in this offense. Negroes made up 49 percent of the total arrests for murder in 1978, whites comprised 47 percent, and the remaining 4 percent were of other races.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit forcible rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

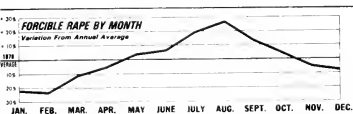

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	63,022	29.1
1978	67,131	30.8
Percent change	+ 6.5	+ 5.8

Volume

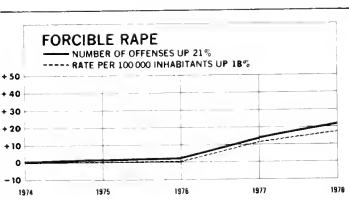

During 1978, there was an estimated total of 7,131 forcible rapes. Forcible rape continued, as in prior years, to comprise less than 1 percent of the Crime Index total and accounted for 6 percent of the volume of violent crimes. When viewed geographically, the Southern States, the region with the highest population, recorded 34 percent of the total volume; the Western States reported 27 percent; the North Central States, 22 percent; and the Northeastern States, 17 percent.

The accompanying chart indicates that more rapes occur in the summer months of the year.

Trend

The number of forcible rape offenses in 1978 was up nearly 7 percent over 1977 and 21 percent over 1974. During 1978, 40 percent of the forcible rapes occurred in cities with 250,000 or more inhabitants; a 5-percent increase in volume over the previous year has been seen in this group. In the suburban areas forcible rape offenses rose 5 percent, and the rural areas registered a 2-percent increase over 1977. Geographically, all regions indicated upswings in the volume of forcible rape offenses. In the South they increased 10 percent; in the West, 8 percent; in the North Central, 5 percent; and in the Northeast, 1 percent.

Rate

For Uniform Crime Reporting purposes the victims of forcible rape are always female. In 1978, an estimated 60 out of every 100,000 females in this country were reported rape victims, a 5-percent rate increase over 1977. Since 1974, the forcible rape rate has risen 18 percent.

The SMSAs experienced a rate of 72 victims per 100,000 females. Cities outside metropolitan areas (Other Cities) experienced a rate of 31 per 100,000 females, and the rural areas followed closely with 27 per 100,000 females. Geographically, the Western States reported females were rape victims at the rate of 89 per 100,000. In the South this rate was 63 per 100,000; in the North Central States, 50 per 100,000; and in the Northeast, 45 per 100,000.

Nature

Of all reported offenses in this category during 1978, 75 percent were rapes by force. Attempts or assaults to commit forcible rape comprised the remainder. Forcible rape, a violent crime against the person, has been recognized by law enforcement as one of the most underreported of all Index crimes, primarily because of victims' fear of their assailants and their embarrassment over the incident.

Clearances

Fifty percent of the total forcible rapes reported to law enforcement in 1978 were cleared by arrest or exceptional means. The rural areas indicated a 64-percent clearance rate, while large cities with populations of 250,000 or more and the suburban areas reported clearances in 50 and 49 percent of the forcible rapes, respectively. Of the total clearances for forcible rape, 9 percent involved solely persons under the age of 18.

Persons Arrested

Total 1978 arrests for forcible rape increased 2 percent from 1977 figures and 8 percent from those for 1974. Arrests of persons under 18 years of age for this offense decreased 10 percent from 1974. During the year, 54 percent of the forcible rape arrests were of males under the age of 25, and 28 percent of the arrestees were in the 18- to 22-year age group. Forty-eight percent of the persons arrested for forcible rape in 1978 were white, 48 percent Negro, and all other races comprised the remainder.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

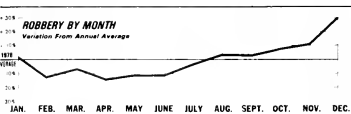

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	404,847	187.1
1978	417,038	191.3
Percent change	+ 3.0	+ 2.2

Volume

In 1978, the estimated robbery total was 417,038 for the United States, amounting to 4 percent of the total Crime Index and 39 percent of the crimes of violence. During the year, robberies occurred most frequently during the month of December.

The Northeastern States experienced the highest proportion of robberies, 31 percent of the total. The Southern States followed with 25 percent; the North Central States reported 21 percent; and the Western States accounted for the remainder.

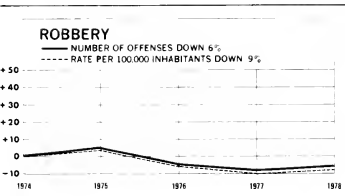

Trend

The 1978 robbery volume increased 3 percent from the previous year and decreased 6 percent from the 1974 experience.

Suburban areas reported a 5-percent rise in robbery offenses in 1978 when compared with the 1977 volume. Increases were also recorded by the rural areas and cities with 250,000 or more inhabitants, 2 and 1 percent, respectively.

Geographically, the Western and Southern States each experienced a 9-percent upswing in robbery from 1977 to 1978. The Northeastern States had a 1-percent rise, while in the North Central States a 6-percent decrease was recorded.

The accompanying chart depicts the trend in the volume of robbery, as well as the robbery rate for the years 1974-1978.

Rate

The 1978 rate of 191 robberies per 100,000 inhabitants was 2 percent above the 1977 rate. Robbery is primarily a large-city crime with 7 out of

10 occurring in those cities with populations of 100,000 or more. The robbery rate for these cities was 498 per 100,000 people in 1978.

There were 249 robberies per 100,000 inhabitants in the SMSAs during 1978. The cities outside metropolitan areas (Other Cities) experienced a rate of 50 robbery offenses per 100,000 population, and in the rural areas, the robbery rate was 21 per 100,000 inhabitants.

Regionally, robbery occurred most frequently in the Northeastern States where the rate was 265 per 100,000 inhabitants. The rate per 100,000 inhabitants for the Western States was 228; for the North Central States, 152; and for the Southern States, 151.

Nature

During 1978, the average value loss per robbery was \$434, for a total reported loss of \$181 million. The impact of this violent crime on the victim cannot be measured in terms of monetary loss alone. While the object of a robbery is money or property, many victims of this crime suffer serious personal injury.

Nationally, nearly half of the reported robberies committed in 1978 were perpetrated on the streets or highways. During the year, 4,676 bank robberies were reported, with an average loss of \$2,866.

From 1974 to 1978, bank robberies increased 43 percent; gas or service station holdups rose 52 percent; convenience store robberies fell 5 percent; and holdups of other commercial or business establishments were down 20 percent. For the 5-year period, residential robberies were down 3 percent, while street robberies declined 4 percent.

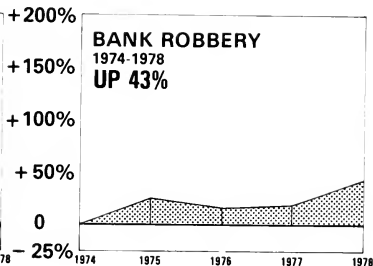

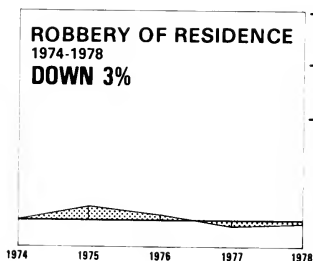

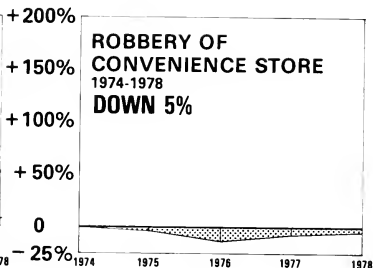

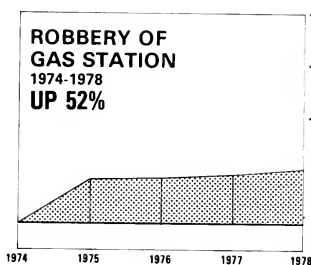

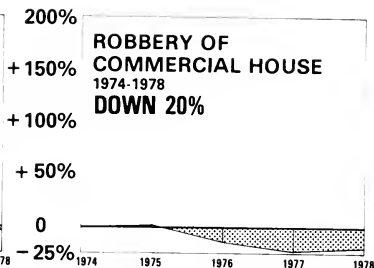

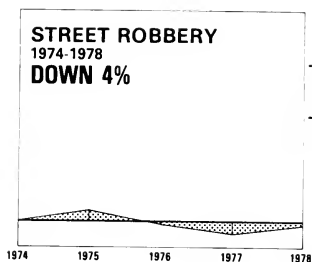

In 1978, 41 percent of all reported robberies were committed through use of firearms; 37 percent by strong-arm tactics (hands, fists, feet, etc.); 13 percent by use of knives or cutting instruments; and 9 percent through the use of other weapons.

Robbery, Percent Distribution, 1978

[By region]

	Total	North-eastern States	North Central States	Southern States	Western States
Total ¹	100.0	100.0	100.0	100.0	100.0

Total	100.0	40.8	12.7	9.0	37.5

¹Because of rounding, percentages may not add to totals.

Clearances

In 1978, law enforcement agencies were successful in clearing 26 percent of the robbery offenses reported. Eighty-four percent of the total robberies cleared involved adults. Only persons under 18 years of age were involved in 24 percent of strong-arm robberies cleared; 15 percent of robberies cleared in

which knives or other cutting instruments were used; 10 percent in which firearms were employed; and 14 percent of those involving other dangerous weapons.

Persons Arrested

Nationally, arrests for robbery rose 1 percent in 1978 when compared to 1977. Arrests in cities increased 2 percent, while they decreased 5 percent in the rural areas and 1 percent in the suburban areas.

Data on arrests disclosed that 75 percent of the persons arrested for robbery were under 25 years of age and 56 percent were under 21. Of all persons arrested for robbery in 1978, 34 percent were under the age of 18, a 1-percent decrease from 1977.

An average of 7 out of every 100 persons arrested for robbery during 1978 were female. Arrests of women for this offense declined 4 percent when compared to 1977.

From the standpoint of race, 59 percent of those arrested were Negro, 38 percent were white, and 3 percent were other races.

AGGRAVATED ASSAULT

DEFINITION

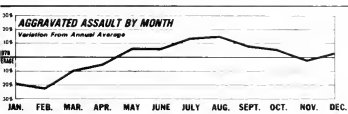

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	522,509	241.5
1978	558,102	255.9
Percent change	+ 6.8	+ 6.0

Volume

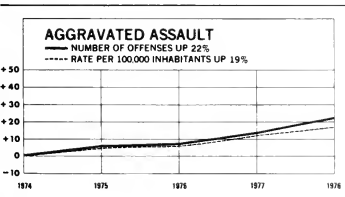

During calendar year 1978, there were an estimated 558,102 aggravated assaults in the Nation. This crime against the person made up 5 percent of the total Crime Index in 1978 and comprised 53 percent of the crimes of violence. Regionally, the Southern States, accounting for the largest proportion of the United States population, reported 36 percent of the total count of these crimes. The Western States followed with 23 percent; the Northeastern States with 21 percent; and the North Central States with 20 percent. As has been the experience in previous years, the highest frequency of aggravated assaults during 1978 occurred in the summer months.

Trend

Since 1974, the volume of aggravated assaults increased 22 percent, and a 7-percent rise occurred from 1977 to 1978. Rural areas and cities with 50,000 or more population each were up 5 percent over the previous year, and suburban areas reported a 6-percent increase during the same period.

A rise was also seen in the volume of aggravated assaults in each geographic region. The North Central States had an upswing of 9 percent; the Western States rose 7 percent; and the Southern and Northeastern States each showed increases of 6 percent.

Rate

During 1978, there were 256 victims of aggravated assault per 100,000 United States' inhabitants. In MSAs the aggravated assault rate was 288 per 100,000 inhabitants; in cities outside metropolitan

areas (Other Cities) it was 214 per 100,000 inhabitants; and in rural areas it was 132 per 100,000 inhabitants. Nationwide, the rate for aggravated assault increased 6 percent over 1977 and 19 percent over 1974.

Of the four geographic regions, the Western States had the highest rate, 325 per 100,000, followed by the Southern States with 284; the Northeastern States with 233; and the North Central States with 193.

Nature

In 1978, 22 percent of the serious assaults were committed with the use of firearms; knives or other cutting instruments were used in 23 percent; 28 percent were committed with blunt objects or other dangerous weapons; and the remaining 27 percent were committed with personal weapons such as hands, fists, and feet. A comparison of aggravated assault from 1974 to 1978 revealed that the use of firearms as weapons increased 7 percent; assaults with knives or other cutting instruments rose 16 percent; assaults where blunt objects or other dangerous weapons were used increased 48 percent; and those aggravated assaults committed through the use of personal weapons climbed 19 percent. The accompanying table exhibits the regional experience of aggravated assault in 1978 by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1978

[Percent distribution]

Region	Total ¹ all weapons	Fire-arms	Knife or other cutting instruments	Other weapons: club, poison, etc.	Personal weapons
Northeastern States ...	100.0	14.1	24.8	29.8	31.3
North Central States ...	100.0	23.3	23.6	30.3	22.8
Southern States ...	100.0	26.9	24.3	25.8	23.0
Western States ...	100.0	21.8	18.8	28.7	30.6
Total	100.0	22.4	22.6	28.3	26.6

¹Because of rounding, percentages may not add to totals.

Clearances

Collectively, law enforcement agencies cleared an average of 62 per 100 cases of aggravated assault in 1978. This relatively high clearance rate was consistent with high rates for other crimes against the person. Persons under 18 years of age, exclusively, were identified in 10 percent of the aggravated assault clearances.

Persons Arrested

Arrests for aggravated assault, during the period 1974-1978, were up 8 percent. Since 1974, arrests of persons 18 years of age and over for aggravated

assault have risen 9 percent, and arrests of persons under 18 years of age for this offense have increased 2 percent.

As a group, persons 21 years of age and over accounted for 69 percent of the 1978 arrests for aggravated assault, and those under age 21 account-

ed for 31 percent. Arrests of males for this offense outnumbered females by a 7 to 1 ratio.

Whites made up 58 percent of the arrests for aggravated assault, Negroes 39 percent, and all other races accounted for the remainder.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

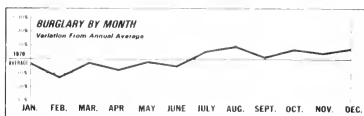

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	3,052,189	1,410.9
1978	3,104,496	1,423.7
Percent change	+ 1.7	+ .9

Volume

An estimated total of 3,104,496 burglaries occurred in the United States during 1978. For the year, large cities with 250,000 or more inhabitants accounted for 29 percent of the total burglary figure.

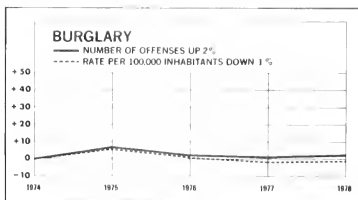

Burglary made up 28 percent of the total Crime Index offenses and was found to comprise 31 percent of the property crimes. Geographically, the Southern States, the most populous region, experienced 31 percent of all reported burglaries; the Western States, 25 percent; and the Northeastern and North Central States, 22 percent each.

Viewed monthly, the highest volume of burglaries was recorded in August of 1978.

Trend

The 5-year trend, 1974-1978, indicated burglary offenses rose 2 percent. Nationally in 1978, the burglary volume increased 2 percent over 1977. For the year, cities 250,000 and over in population and the rural areas each reported decreases of 1 percent, while the suburban areas recorded a 2-percent rise. Regionally, the Southern States registered a 4-percent upswing, the Western States a 3-percent increase, and the North Central States a 1-percent rise. Only the Northeastern States recorded a decrease, 2 percent.

Rate

In 1978, the burglary rate increased 1 percent over 1977 to 1,424 burglaries per 100,000 inhabitants. During the period 1974-1978, the rate fell 1 percent. For 1978, the SMSAs reported a rate of 1,627 burglaries per 100,000 people. Cities outside metro-

politan areas (Other Cities) had a rate of 1,032 for every 100,000 in population, and the rural areas recorded a lower rate of 746 per 100,000 inhabitants.

The Western States recorded the highest 1978 burglary rate with 1,958 offenses per 100,000 inhabitants. Following were the Northeastern States with a rate of 1,381; the Southern States with 1,370; and the North Central States with 1,157.

Nature

Seventy-three percent of the burglaries in 1978 involved forcible entry, 19 percent were unlawful entries (without force), and 8 percent were forcible entry attempts.

Residential offenses accounted for 65 percent of the total burglaries in 1978; nonresidential burglaries made up the remaining 35 percent. Daytime occurrences increased 5 percent for both the residential and nonresidential categories in 1978 from 1977. Nonresidential nighttime burglaries also rose (1 percent), while residential nighttime burglaries showed the only decrease, 3 percent.

During the period 1974-1978, daytime burglaries rose in volume, while nighttime incidents declined. Residential burglaries were up 10 percent during the day, but decreased 1 percent for the nighttime. Nonresidential daytime occurrences increased 1 percent, while nighttime occurrences fell 15 percent.

Burglary represents a substantial financial loss. In 1978, burglary victims suffered losses totaling \$1.1 billion. The average dollar loss per burglary was \$526.

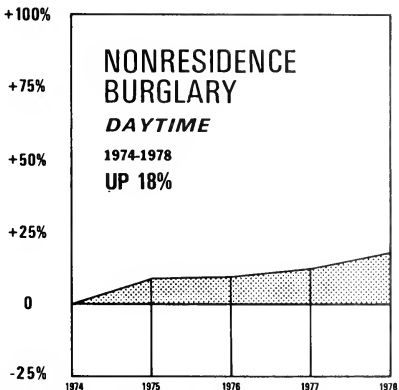

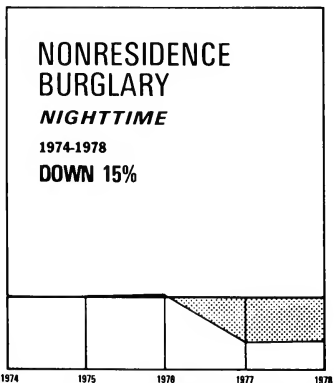

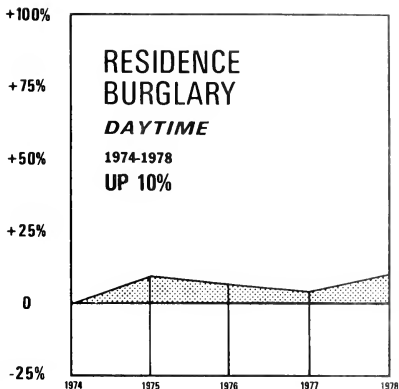

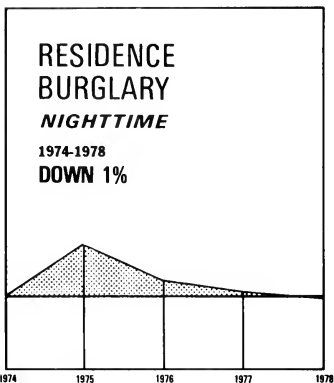

Clearances

In 1978, 16 percent of the total burglary offenses were cleared. Adults were involved in 66 percent of all cases cleared; and in 34 percent of the total burglary clearances only young persons under 18 years of age were the offenders.

Law enforcement agencies in rural areas cleared 14 percent of the burglaries reported within their jurisdictions in 1978, while those in the suburban areas recorded a clearance rate of 16 percent. Agencies in cities with 250,000 or more inhabitants obtained clearances in 14 percent of these crimes.

Persons Arrested

In the UCR Program, the arrest of one person may account for the clearance of numerous crimes. Likewise, the arrest of several may clear but one offense. In the case of burglary, law enforcement agencies frequently clear several reported offenses by the arrest of one individual. When the 1978 and 1977 burglary figures were compared, increases of less than 1 percent were seen for total burglary arrests.

BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

for arrests of persons under the age of 18, and for arrests of persons aged 18 and over. Arrests for burglary were up 1 percent in both the suburban and rural areas, while they decreased less than 1 percent in the Nation's cities.

In analyzing the 1974-1978 period, a 5-percent decline in burglary arrests was seen. Arrests of individuals under the age of 18 dropped 7 percent, and arrests of adult burglary offenders fell 4 percent.

Nationally, in 1978, persons under 25 years of age accounted for 84 percent of all arrests for burglary and 52 percent of all arrested for this crime under the age of 18. An average of 6 of each sex and 3 persons arrested for this crime during 1978 were female. Of the total burglary arrests, whites accounted for 68 percent, Negroes for 29 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

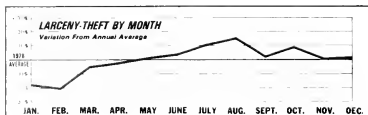

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	5,905,731	2,729.9
1978	5,983,401	2,743.9
Percent change	+ 1.3	+ .5

Volume

In 1978, there were an estimated 5,983,401 offenses of larceny-theft. This high-volume offense made up 54 percent of the Crime Index total. As in 1977, the volume of larceny-theft was highest during August of 1978.

Geographically, the Southern States, which are the most populous, reported the highest number of larceny-thefts, accounting for 31 percent of the total. The North Central States followed with 26 percent, while the Western States recorded 24 percent and the Northeastern States 19 percent.

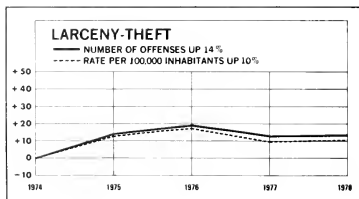

Trend

Larceny-theft rose 1 percent in volume from 1977 to 1978. The large cities with 250,000 or more inhabitants reported a decrease of 1 percent. The rural and suburban areas increased, 2 and 1 percent, respectively.

When viewed regionally, larceny-theft showed varying trends. The Southern and Western States experienced upswings of 4 and 3 percent, respectively, while the Northeastern States reported a 3-percent decline. In the North Central States, the volume of larceny-theft showed virtually no change from the year before.

Nationwide, larceny-thefts climbed 14 percent since 1974.

Rate

During 1978, there were 2,744 larceny-thefts per 100,000 United States' inhabitants, an increase of less than 1 percent from the 1977 rate. The rate increased 10 percent since 1974. In the SMSAs, the 1978

larceny-theft rate was 3,101 per 100,000 inhabitants, 2,812 per 100,000 inhabitants in cities outside metropolitan areas (Other Cities); and 953 in the rural areas.

The Western States reported the highest 1978 larceny-theft rate with 3,555 offenses per 100,000 inhabitants, a 1-percent increase over 1977. The North Central States had a rate of 2,687, down 1 percent; the Southern States 2,597, up 3 percent; and the Northeastern States, with a rate of 2,360, reported a decrease of 2 percent.

Nature

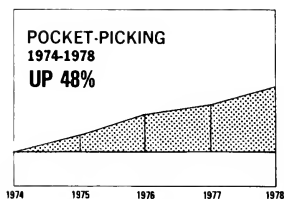

For each reported larceny-theft in 1978 the average value of property stolen was \$219, up from \$195 in 1977. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was \$1.3 billion. While a portion of the goods stolen is recovered, the relatively low clearance percentage for larceny-thefts (20 percent) and the frequent absence of owner identification on recovered property indicate the overall loss due to this criminal activity is not reduced. In addition, other studies have indicated many offenses in this category, particularly if the value of the stolen good is small, never come to police attention.

In 1978, the average value of goods and property reported stolen as a result of pocket-picking was \$152; by purse-snatching, \$114; and by shoplifting \$49. Additionally, miscellaneous thefts from buildings and thefts from motor vehicles averaged \$331 and \$254, respectively.

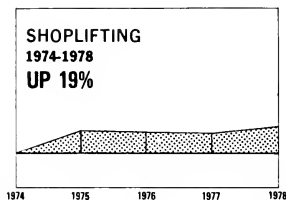

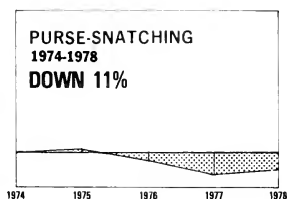

As in prior years, a large portion of these offenses, 36 percent, was comprised of thefts of motor vehicle parts, accessories, and contents. Other major types of thefts which contributed to the large number of these crimes were those from buildings, 17 percent, and stolen bicycles and shoplifting, 11 percent each. The remainder was distributed among pocket-picking, purse-snatching, thefts from coin-operated machines and miscellaneous types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

Clearances

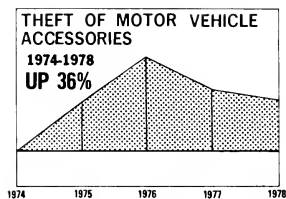

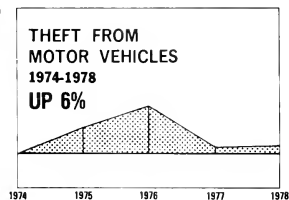

In 1978, 20 percent of all larceny-thefts brought to the attention of law enforcement were cleared. One of every 3 of these crimes cleared in the Nation's cities and suburban areas involved persons under 18 years of age exclusively. In the rural areas, larceny-theft clearances for this age group represented 21 percent of the total.

Persons Arrested

The larceny-theft category not only comprised the largest portion of the total Crime Index offenses

reported, it also accounted for 50 percent of the total arrests for Index crimes in 1978. Arrests for this offense increased 2 percent, 1978 over 1977. Forty-two percent of these arrests were of persons under 18 years of age, and 59 percent of the arrestees were under 21. More females, accounting for 32 percent of all arrests for larceny-theft, were arrested for this offense than any other in 1978. Arrests of both males and females for larceny-theft violations increased in 1978, 2 and 3 percent, respectively. Arrests of whites outnumbered Negroes by more than 2 to 1, with all other races comprising approximately 3 percent of total larceny-theft arrests.

During the period 1974-1978, the total volume of larceny-theft arrests rose 5 percent. Adult arrests were up 16 percent for this 5-year period, while those of persons under 18 years of age decreased 6 percent.

MOTOR VEHICLE THEFT

DEFINITION

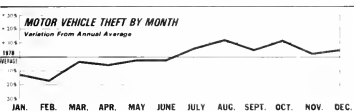

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1977	968,358	447.6
1978	991,611	454.7
Percent change	+ 2.4	+ 1.6

Volume

In 1978, an estimated total of 991,611 thefts of motor vehicles occurred. These offenses comprised 9 percent of all Index crimes. Geographically, the volume of motor vehicle thefts in 1978 was highest in the Northeastern States, which reported 30 percent of the total. The Southern States accounted for 24 percent, and the North Central and the Western States each reported 23 percent. The volume of motor vehicle thefts was highest during the month of August.

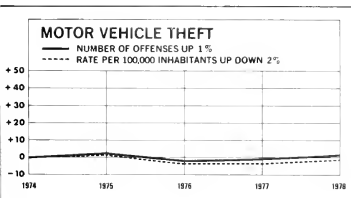

Trend

The number of motor vehicle thefts rose 2 percent from 1977 to 1978.

During the 1977-1978 period, thefts of motor vehicles decreased 3 percent in large cities with 250,000 or more inhabitants, while the suburban and rural areas recorded increases of 4 and 7 percent, respectively.

Geographically, motor vehicle thefts were up 10 percent in the Southern States and 7 percent in the Western States. The Northeastern States reported a 3-percent decrease, and the North Central States, a 1-percent decline from the prior year. The accompanying chart shows that the number of motor vehicle thefts has increased 1 percent since 1974.

Rate

The 1978 motor vehicle theft rate of 455 offenses per 100,000 inhabitants rose 2 percent from 1977, while showing a 2-percent decrease from the 1974 experience. In 1978, 1,114 thefts per 100,000 inhabi-

tants occurred in cities with populations over one million.

Nationally, the motor vehicle theft rate in the SMSAs was 559 per 100,000 inhabitants. Cities outside metropolitan areas (Other Cities) had a motor vehicle theft rate of 234, and the rural areas recorded the lowest rate, 124.

Regionally, the Northeastern States had the highest motor vehicle theft rate, 607 per 100,000 inhabitants, a decline of 3 percent from 1977. The Western States followed with 570, up 4 percent; and the North Central States experienced a 1-percent decrease from the prior year, or 396 thefts per 100,000 inhabitants. The Southern States' rate of 332 per 100,000 population represented a 9-percent increase.

Nationwide in 1978, an estimated average of 1 of every 145 registered motor vehicles was stolen. Regionally, this rate was greatest in the Northeastern States where 11 of every 1,000 registered motor vehicles were stolen. In the other three regions the figures were 8 per 1,000 in the Western States, 6 in the North Central States, and 5 in the Southern States.

Nature

The average value of motor vehicles stolen during 1978 was \$2,325 at the time of theft. Of all motor vehicle thefts reported during the year, 78 percent were automobiles, 11 percent were trucks or buses, and 11 percent were other types of motor vehicles. The continuing high motor vehicle theft rates in the most heavily populated municipalities of the Nation clearly indicate this crime is primarily a large-city problem.

Motor Vehicle Theft, 1978

[Percent distribution]

Region	Total ¹	Autos	Trucks and buses	Other vehicles
Northeastern States ..	100.0	89.6	5.3	5.1
North Central States ..	100.0	77.5	11.4	11.1

Western States	100.0	71.4	13.7	14.9
Total	100.0	77.8	11.3	11.0

¹Because of rounding, percentages may not add to totals.

Clearances

Fifteen percent of the motor vehicle thefts in 1978 were cleared by arrest of the offender(s) or by exceptional means. Geographically, motor vehicle theft clearance percentages ranged from 24 percent in the South Atlantic States to 9 percent in the New England States.

In all geographic divisions and population groups, a high proportion of the clearances involved only persons under 18 years of age. In the Nation's cities and suburbs, persons in this age group accounted for 29 percent of the motor vehicle thefts cleared, while they accounted for 27 percent in the rural areas.

Persons Arrested

As in prior years, motor vehicle theft arrests primarily involved the younger segment of the Nation's population. Seventy percent of all persons arrested for motor vehicle theft during 1978 were

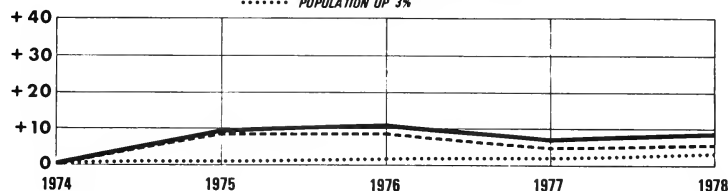

under 21 years of age, and those under 18 accounted for 51 percent of the total.

When the total volume of arrests for this offense during 1978 was compared with that of the previous year, an increase of 5 percent was evident. Adult arrests rose 10 percent over 1977, while arrests of persons under 18 were up less than 1 percent. However, during the period 1974-1978, motor vehicle theft arrests decreased 3 percent.

Whites made up 69 percent of the arrests for motor vehicle theft, Negroes 27 percent, and all other races accounted for the remainder.

CRIME INDEX TOTAL

— CRIME INDEX OFFENSES UP 9%

 POPULATION UP 3%

Crime Index Total

In 1978, an estimated 11,141,334 Crime Index offenses, 2 percent more than during 1977, were reported to law enforcement agencies. The violent and property crime categories each showed increases. Collectively, violent crimes, which comprised 10 percent of the total Crime Index, increased 5 percent and property crimes 2 percent.

All offenses within the Index increased in volume during the year. Among the violent crimes, murder was up 2 percent; forcible rape and aggravated

assault, 7 percent each; and robbery, 3 percent. In the property crime category, larceny-theft rose 1 percent, while burglary and motor vehicle theft each increased 2 percent.

Since 1974, the total volume of Crime Index offenses increased 9 percent. Likewise, rises of 9 percent were seen in both the violent and property crime categories for this 5-year period.

The estimated 1978 crime figures are set forth in the table entitled "National Crime, Rate, and Percent Change."

National Crime, Rate, and Percent Change

Crime Index Offenses	Estimated crime 1978		Percent change over 1977		Percent change over 1974		Percent change over 1969	
	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants
Total ¹	11,141,300	5,109.3	+1.9	+1.1	+8.7	+5.3	+50.3	+38.8
Violent	1,061,830	486.9	+5.2	+4.4	+8.9	+5.6	+60.4	+48.1
Property	10,079,500	4,622.4	+1.5	+7	+8.6	+5.3	+49.3	+37.9
Murder	19,560	9.0	+2.3	+2.3	-5.6	-8.2	+32.5	+23.3
Forcible rape	67,130	30.8	+6.5	+5.8	+21.2	+17.6	+80.6	+66.5
Robbery	417,040	191.3	+3.0	+2.2	-5.7	-8.6	+39.5	+28.9
Aggravated assault	558,100	255.9	+6.8	+6.0	+22.3	+18.6	+79.4	+65.6
Burglary	3,104,500	1,423.7	+1.7	+9	+2.1	-1.0	+56.6	+44.7
Larceny-theft	5,983,400	2,743.9	+1.3	+5	+13.7	+10.2	+53.9	+42.1
Motor vehicle theft	991,600	454.7	+2.4	+1.6	+1.5	-1.6	+12.9	+4.2

¹Due to rounding, offenses may not add to Crime Index totals.

Regional Offense and Population Distribution, 1978

Region	Population	Crime Index total	Murder	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft
United States total ¹	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Northeastern States	22.5	21.5	17.3	16.8	31.2	20.5	21.8	19.4	30.0
North Central States	26.7	24.1	21.1	22.1	21.3	20.2	21.7	26.2	23.0
Southern States	32.4	30.3	42.0	33.8	25.5	36.0	31.2	30.7	23.0
Western States	18.4	24.1	19.6	27.2	22.0	23.3	25.3	23.8	23.0

¹Because of rounding, percentages may not add to totals.

Provided in the table, "Regional Offense and Population Distribution, 1978," are data showing the estimated geographical distribution of Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1978, they also represented the greatest regional population.

Based on the Crime Index offenses, crime rates relate the incidence of reported crime to population. However, many factors, some of which are shown on page v of this publication, influence the nature and extent of crime in a particular community. A crime rate takes into consideration only the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area.

The table, "Crime Rate, Region, 1978," lists the crime rates for the four geographic regions of the United States.

Crime Rate, Region, 1978

[Rate per 100,000 inhabitants]

Crime Index offenses	North-eastern States	North Central States	Southern States	Western States
Total	4,877.1	4,617.8	4,778.0	6,691.2
Violent	528.6	378.3	478.7	608.3
Property	4,348.5	4,239.5	4,299.3	6,082.9
Murder	6.9	7.1	11.6	9.5
Forcible rape	23.0	25.5	32.2	45.5
Robbery	265.4	152.5	150.5	228.4
Aggravated assault	233.3	193.2	284.3	324.8
Burglary	1,381.2	1,156.6	1,370.5	1,957.5
Larceny-theft	2,360.3	2,686.6	2,597.2	3,555.4
Motor Vehicle theft	607.0	396.3	331.7	569.9

The table, "Crime Rate, Area, 1978," presents the crime experience in SMSAs, rural areas, and cities and towns outside metropolitan areas (Other Cities).

This table illustrates the higher crime rates in the metropolitan areas.

Crime Rate, Area, 1978

[Rate per 100,000 inhabitants]

Crime Index offenses	Total United States	Metropolitan area	Rural	Other cities
Total	5,109.3	5,870.2	1,997.9	4,363.0
Violent	486.9	583.9	174.8	285.0
Property	4,622.4	5,286.3	1,823.1	4,078.0
Murder	9.0	9.9	7.5	5.0

Larceny-theft	2,743.9	3,101.1	953.3	2,812.0
Motor vehicle theft	454.7	558.6	123.5	234.0

Crime Index Tabulations

In the accompanying tables, data on crime in the United States as a whole; geographic divisions: individual states; Standard Metropolitan Statistical Areas; and cities, towns, and counties are presented. The measure used is a Crime Index consisting of seven offenses: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

Although the total number of criminal acts occurring is unknown, offenses reported to law enforcement agencies represent an indicator of criminal activity. Considering that not all crimes come to the attention of law enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur in sufficient volume and frequency to be meaningful in an index, the above-mentioned crimes were selected as a group to furnish an abbreviated and convenient measure of the crime problem.

In reviewing the tables in this report it must be remembered that many factors can cause the volume and type of crime to vary from place to place.

population, one of these factors, is used in computing crime rates; however, all communities are affected to some degree by seasonal or transient populations. Since estimates of current permanent population are used to construct crime rates, short term population variability is not accounted for in these rates.

In addition to the presentations outlined above, national averages for the value of property stolen in connection with each offense are presented in the tables. Further breakdowns by type for the robbery, burglary, and larceny-theft classifications are listed.

Also, data on the type and value of property stolen and recovered are provided.

National averages can serve as a valuable guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of his force in combating crime. The analysis, however, should not end with such a comparison, for it is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

¹Populations are Bureau of the Census provisional estimates as of July 1, 1978.²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.³The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Table 2.—Index of Crime, United States, 1969–1978

¹1978 figures not comparable with prior years, and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses or annexation are removed from trend tables.

¹Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

²Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

³Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

⁴Includes state police agencies with no county breakdown.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

SECTION III

CRIME INDEX OFFENSES CLEARED

Law enforcement agencies clear a crime when they have identified the offender, have sufficient evidence to charge him, and actually take him into custody, or in exceptional instances, when some element beyond police control precludes taking the offender into custody. Examples of circumstances resulting in exceptional clearances would be the refusal of a victim to prosecute after an offender is identified or because a subject is being prosecuted elsewhere for a crime committed in another jurisdiction and extradition is not imminent. It should be noted that the arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

In 1978, law enforcement agencies reported that, nationally, 21 percent of the Index crimes were cleared. With respect to violent crimes, 76 percent of murder offenses, 50 percent of forcible rapes, 62 percent of aggravated assaults, and 26 percent of robberies were cleared by law enforcement agencies. In connection with property crimes, police cleared 20 percent of the larceny-thefts, 16 percent of the

burglaries, and 15 percent of the motor vehicle thefts. Clearances for crimes against persons are generally higher not only because more intense investigative efforts are often afforded these offenses, but because witnesses who can identify the perpetrators are frequently available.

Regionally, the highest overall Crime Index clearance rate was recorded by the Southern States with 23 percent, followed by the Western and North Central States, each with 21 percent, and the Northeastern States with 18 percent.

Clearances Involving Only Persons Under 18 Years of Age

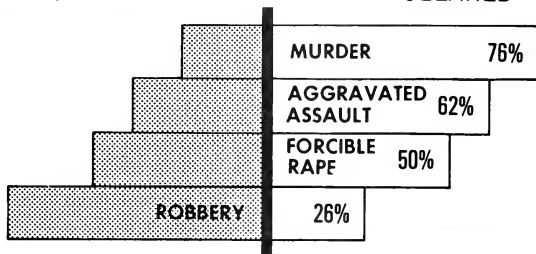

In 1978, 28 percent of all Crime Index offenses cleared were those in which only persons under 18 years of age were the offenders. Clearances for the violent and property crimes involving only youths in the aforementioned age group were 12 and 33 percent, respectively. During the same year, persons 10 to 17 years of age accounted for approximately 14 percent of the total United States population.

¹Includes offenses cleared by exceptional means.²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.⁴Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

SECTION IV

PERSONS ARRESTED

Primarily an indication of law enforcement activity, the number of arrests provides a limited profile of the perpetrators of crime. This is especially true for those crimes which have a high clearance rate. Arrest practices, policies, and enforcement emphases which often differ within and among agencies influence the volume of arrests for various offenses, particularly those against public order such as drunkenness, vagrancy, disorderly conduct, and related violations. Arrests for serious crimes, e.g., robbery or burglary, are more likely to be consistent and uniform throughout all jurisdictions. Annual arrest statistics do not measure the number of persons taken into custody, but rather the number of arrests made in the year. Because a single person may be arrested more than once during the year, this person will be counted for each arrest. Procedures employed in this Program require that an arrest be counted on each separate occasion an individual is taken into custody, notified, or cited.

Law enforcement agencies in the United States effected an estimated 10.3 million arrests in 1978 for all criminal infractions other than traffic violations. Nationally, the arrest rate per 1,000 inhabitants was 47; for cities with populations over 250,000, the rate was 67; for suburban counties, 45; and in rural counties, 32.

Arrest Trends

Arrests by law enforcement for all crimes other than traffic violations increased 2 percent in 1978 from 1977. In this same period, arrests of persons 18 years of age and over were up 3 percent, while arrests of persons under 18 years of age decreased 2 percent. When only arrests for Crime Index offenses were used to compute a trend for all ages, a 2-percent increase was evident for 1978 as compared to 1977.

During the 5 years from 1974 to 1978, arrests for all offenses except traffic decreased 2 percent, with arrests of persons under 18 years of age down 10 percent. However, arrests of persons 18 years of age and over increased 1 percent. When restricted to Crime Index offenses, a rise of 1 percent in total

arrests and an increase of 8 percent in adult arrests occurred during the 5-year period. In this same time, arrests of persons under 18 years of age dropped 7 percent. Violent and property crime arrests for persons under 18 years of age both declined, 8 and 7 percent, respectively.

Arrests for drug abuse violations in 1978 decreased 1 percent nationwide from 1977. In the period 1974 to 1978, arrests for these violations were down 17 percent. The types of drugs involved in violations resulting in arrests during 1978 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations

[Percent distribution]

	Total	Heroin or cocaine	Mari- juana	Syn- thetic narcotics	Other

Sale/manufacture ...	18.0	3.7	9.6	.9	3.8
Possession ...	82.0	9.5	61.3	1.8	9.4

Age

In the Nation, 7 percent of all persons arrested were under the age of 15, 23 percent were under 18, 40 percent were under 21, and 57 percent were under 25. In the suburban areas the volume of arrests of persons in the young-age groups was greater than the national figures, with the under 15 age group representing 9 percent; under 18, 28 percent; under 21, 46 percent; and under 25, 62 percent. The distributions of arrests in the rural areas were lower for the younger age groups, with the under 15 group being involved in only 3 percent; under 18, 14

PERSONS ARRESTED DISTRIBUTION BY AGE, 1978¹

TOTAL POPULATION DISTRIBUTION BY AGE, 1978²

¹ PERSONS ARRESTED IS BASED ON REPORTS RECEIVED REPRESENTING POPULATION.

² THE TOTAL POPULATION IS 218,059,000 FOR THE U.S., BASED ON BUREAU OF CENSUS PROVISIONAL ESTIMATES, JULY 1, 1978.

percent; under 21, 31 percent; and those under 25 in 19 percent.

Considering only the Crime Index offenses, the percent of all arrestees in the Nation during 1978 who were under the age of 15 was 15 percent; under the age of 18, 41 percent; under 21, 58 percent; and under 25, 72 percent.

Sex

Male arrests increased 1 percent in 1978 over 1977, and even though female arrests rose 2 percent, arrests of males outnumbered those of females by 5 to 1, nationally. Males also accounted for 80 percent of the arrests for Index crimes and 90 percent of the arrests for crimes of violence.

Female arrests for Index crimes were up 3 percent over 1977. As in previous years, their criminal involvement was mainly for larceny, which accounted for 80 percent of all female arrests for Index offenses.

Arrests of males and females under 18 years of age decreased 10 percent for both sexes from 1974 to 1978. Arrests for Crime Index offenses during this 5-

year period declined 4 percent for females under age 18 and 7 percent for males in the same age group.

Arrest Rates

Arrest rates are a measure of law enforcement activity in response to crime. The accompanying table presents the arrest rates per 100,000 inhabitants in the United States, by geographic region, for Crime Index offenses.

Arrests, Region, 1978

[Rate per 100,000 inhabitants]

Offense	United States total	North-eastern States	North Central States	Southern States	Western States
Murder	9.1	7.4	7.3	11.5	9.2
Forcible rape	13.6	15.1	10.9	14.2	14.8
Robbery	68.3	110.7	46.7	52.5	75.3
Aggravated assault ..	124.4	149.2	57.9	144.7	152.1
Burglary	234.6	259.6	166.7	231.5	304.5

² Because of rounding, the percentages may not add to total.

³ Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities also included in other city group.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.

SECTION V

LAW ENFORCEMENT PERSONNEL

Law Enforcement Employees

As of October 31, 1978, 11,265 agencies, covering more than 203 million inhabitants of the United States, reported a total of 431,000 full-time law enforcement officers for a rate of 2.1 per 1,000 inhabitants. When full-time civilians were included, the total count of law enforcement employees rose to 542,000 for a national rate of 2.7 per 1,000 inhabitants.

Caution should be exercised in using rates for comparative purposes since a wide variation exists in the responsibilities of various law enforcement agencies throughout the country. Just as certain conditions cause the extent and type of crime to vary from place to place, the requirements for types of police service are based upon the conditions present in a given community. For example, the need for law enforcement service in a community having a highly mobile or seasonal population differs from a locale whose population is relatively stable. In addition, a small community situated between two large cities may require a greater number of law enforcement personnel than a similarly sized community having no urban centers nearby. The crime conditions of the former are for the most part dictated by its geographic location.

The figures set forth in detailed tabular presentations on law enforcement employees represent national averages; they should be used as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific community can only be determined by a careful study and analysis of the various factors which contribute to the requirements for law enforcement service in that locality.

The functions of sheriffs also vary widely in different sections of the country. In certain areas the sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the

county jail facilities. Likewise, state police and highway patrol agencies may have vastly different responsibilities from jurisdiction to jurisdiction.

Many cities in the United States operate with substantially fewer law enforcement employees per capita than the national average. For example, the average for cities in the 10,000 to 49,999 population range was 2.0 law enforcement employees per 1,000 inhabitants. This low average rate for smaller cities contrasted by the fact that the average rate for large cities, those with populations of 250,000 or more, was substantially above the national average, 3.4 law enforcement employees per 1,000 inhabitants.

Nationally, suburban areas averaged 2.3 full-time law enforcement employees per 1,000 inhabitants. For sheriffs' or county police departments, the average rate was 2.0 full-time employees.

Geographically, the South Atlantic and Middle Atlantic Divisions recorded the highest rates of law enforcement employees per 1,000 inhabitants, 2.7 and 2.8, respectively. The fewest employees per 1,000 population were reported by the West North Central and West South Central Divisions, each with an average rate of 2.1.

Sworn Personnel

Rates based on sworn law enforcement personnel only (excluding civilians) showed the average for all cities was 2.1 officers per 1,000 inhabitants. The average rate of sworn personnel ranged from 1.6 in cities with populations between 10,000 and 49,999 to 2.8 in cities with 250,000 or more inhabitants. For sheriffs' or county police departments, the average rate was 1.5 per 1,000 population. In city agencies males represented 97 percent of all sworn personnel while in suburban agencies they accounted for 95 percent and in county sheriffs' and police departments 92 percent.

Group II (100,000 to 249,999)	19.0	County	23.2

Civilian Employees

During 1978, 18 percent of all city law enforcement personnel were civilian employees. In suburban areas they represented 20 percent of the total strength and in sheriffs' and county police depart-

ments 23 percent. Civilian employees in law enforcement agencies can be used effectively to free sworn officers for more imperative police duties; they constitute an important aspect of the total law enforcement effort.

Montana	316	220	96	30.4	3,298						

The responsibilities of the various state police and highway patrol agencies range from full law enforcement responsibilities to traffic patrol only. The miles of primary highway from "Highway Statistics, 1977" published by the U.S. Department of Transportation refers to highways that have been officially designated by states as the primary system, or some similar term. The criteria for selecting these highways vary among the states.

State motor vehicle registration data include automobiles, buses, and trucks.

Any comparison of these data from state to state must take these factors and the factors listed on Page v into consideration.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

During 1978, 56,130 assaults on law enforcement officers were reported by 9,150 agencies covering an estimated 180,948,000 inhabitants, or approximately

83 percent of the United States population. The rate of assaults for the Nation was 16 per 100 officers illustrating that such incidents continue to pose a problem for those involved in law enforcement.

Injuries to Law Enforcement Officers

Nearly 22,000 cases of personal injury, a rate of 6 per 100 officers nationwide, resulted from assaults on officers in 1978. Geographically, the injury rate ranged from 3 per 100 officers in the East South Central Division to 10 per 100 in the New England

Division. Within population groups, law enforcement officers in cities with 250,000 or more inhabitants experienced the greatest rate of assaults with injuries 9 per 100. Sheriffs' and county police departments had the lowest injury rate with 3 per 100 officers

Weapons Used in Assaults on Law Enforcement Officers

Personal weapons such as hands, fists, feet, etc., were used in 82 percent of the assaults on officers in 1978. Firearms were used in 5 percent of the assaults, knives or cutting instruments in 3 percent, and other weapons in 10 percent. Tables 66 and 67 present data on the types of weapons used in assaults within

geographic divisions and population groups and by the types of activity in which the officers were involved at the time the assaults occurred.

Time of Assault

Assaults on officers by time and population group are set forth in Table 69. Approximately one-half of the assaults on law enforcement officers occurred between the hours of 8:00 p.m. and 2:00 a.m.

Table 66.—Law Enforcement Officers Assaulted, Weapon Used, 1978

¹Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

Activity of Law Enforcement Officers at the Time of Assault

The largest portion of assaults, 30 percent, occurred while officers were responding to disturbance calls (family quarrels, man-with-gun calls, bar fights, etc.). The activity resulting in the second highest number of assaults was attempting arrests for crimes other than robbery or burglary; 22 percent of the officers assaulted were performing this duty at the time they were attacked.

Type of Assignment

Table 71 shows the types of assignment of officers assaulted. Thirty-five percent were in two-officer vehicles, 43 percent in one-officer vehicles, 6 percent on detective or special assignments, and 14 percent

on other assignments. Vehicle patrol officers were victims in 80 percent of all assaults on officers.

Clearances

Nationwide in 1978, 92 percent of the assaults on law enforcement officers were cleared. Cities with populations from 50,000 to 99,999 had the highest clearance rate, 95 percent.

By activity, the highest clearance percentages for all agencies were recorded for assaults on officers attempting arrests for crimes other than robbery or burglary and those assaulted by mentally deranged persons; in each of these two categories 94 percent of the offenses were cleared. Ambush attacks accounted for the lowest clearance rate with 62 percent. Table 72 shows the percentage of assaults cleared by type of activity and population group.

 1974-1978 558 KILLED

*Puerto Rico
 U.S. Virgin Islands
 Guam
 Foreign

*Data not available for years prior to 1971.

LAW ENFORCEMENT OFFICERS KILLED

In 1978, 93 local, county, state, and Federal law enforcement officers were feloniously killed; this total was the same in 1977. During the 10-year period 1969-1978, 1,123 officers were slain. It should be noted that the collection of statistics regarding officers killed in the line of duty was expanded in 1971 to include United States' territories (Puerto Rico, the Virgin Islands, and Guam). Also, the gathering of data on slain Federal officers was begun in 1972. Therefore, 10-year data on officers killed include figures for United States' territories since 1971 and Federal officers since 1972.

Total 1,123

Geographic Locations

During 1978, 47 officers were slain in the Southern States, the most populous region. Twenty were killed in the Western States, 12 in the Northeastern States, and 10 in the North Central States. Four officers were killed in Puerto Rico. The accompanying chart

shows the number of law enforcement officers killed in the geographic regions during each of two successive 5-year periods, 1969-1973 and 1974-1978. Additionally, information on officers feloniously killed in 1978 by geographic division and population group is presented in tabular form.

Eighty-nine of the 93 officers slain during 1978 were from 78 different local, county, state, and Federal law enforcement agencies in 32 states and the District of Columbia. As indicated above, the remaining 4 were from Puerto Rico.

Among the states, California had the highest count with 12 officers killed. The State of Texas followed with 9 officers slain.

Circumstances Surrounding Deaths

During the year, 15 officers were slain by persons engaged in the commission of a robbery or during the pursuit of robbery suspects, and 3 officers lost their lives at the scene of burglaries or while pursuing burglary suspects. Twenty officers were killed while attempting arrests for crimes other than robbery or burglary.

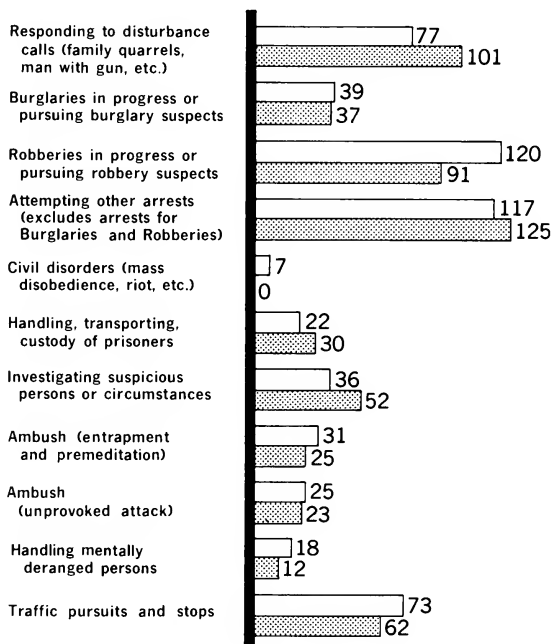

Ambush situations accounted for 12 officers' deaths in 1978. Fifteen officers were killed while enforcing traffic laws and 10 were slain responding to disturbance calls, which include family quarrels, man-with-gun calls, bar fights, etc. Eight officers were killed while investigating suspicious persons or circumstances, 7 while transporting or otherwise engaged in the custody of prisoners, and the remaining 3 officers were slain while handling mentally deranged persons.

Types of Assignment

Of the 93 officers slain in 1978, 61 were on patrol duty. Fifty-nine of the patrol officers were assigned to vehicles and 2 were on foot patrol. The perils inherent in patrol duties are substantiated by the fact officers assigned in this capacity have consistently been the most frequent victims of the police killer in recent years. The patrol officer is often placed in dangerous situations and must react to circumstances as they occur without the benefit of detailed information or planning. He is repeatedly in contact with suspicious or dangerous individuals, each of whom could constitute a threat to his personal safety.

While possibly not with the same regularity, law enforcement officers assigned in other capacities are confronted with equally tense and dangerous situations. In 1978, 21 officers slain were detectives or on special assignments, and in the highest tradition of the law enforcement profession, 11 officers were off duty but taking appropriate police action in response to a criminal act when murdered.

Of the 82 officers who were slain while on duty during 1978, 39 were alone and unassisted when killed. Thirty-six percent (401) of the on-duty officers

killed during the period 1969-1978 were alone at the time they were attacked.

Weapons Used

Ninety-one (98 percent) of the law enforcement officers killed in 1978 were slain with firearms. Handguns were used in 67 of these deaths, rifles in 13, and shotguns were used to kill 11 of the officers. Fourteen officers were slain with their own firearms. Of the 2 officers not slain with firearms, 1 was killed with a blunt instrument and 1 with personal weapons (hands, fists, feet).

Forty-six of the officers killed in 1978 attempted to utilize their service firearms while in contact with their assailants, and 32 of these officers discharged their service weapons while attempting to protect themselves. Forty-one percent (37) of the officers killed by firearms were within 5 feet of their assailants at the time they were shot.

Day and Hour of Attack

As the accompanying data show, it cannot be stated that any one day of the week is more hazardous to a law enforcement officer than any other. However, more officers are slain during the

nighttime hours, especially between 9:00 p.m. and 3:00 a.m. From 1969-1978, 43 percent (484) of the 1,123 officers who lost their lives in the line of duty were killed during the aforementioned 6-hour period.

The following table shows the number of law enforcement officers killed by day of week for the period 1969-1978.

Day of week	Number of victim officers
Sunday	159
Monday	161
Tuesday	140
Wednesday	143
Thursday	164
Friday	186
Saturday	170
Total	1,123

Profile of Victim Officers

Eighty-five (91 percent) of the officers slain during 1978 were white and 8 (9 percent) were Negro. The average years of service for slain officers was 8. Ten percent of the officers killed had 1 year or less of law enforcement experience; 30 percent had more than 1 but less than 5 years of service; 30 percent had 5 through 10 years of experience; and 31 percent had served as law enforcement officers for more than 10 years.

Persons Identified

Law enforcement agencies cleared 84 of the 93 killings that occurred in calendar year 1978. In connection with these crimes, 127 persons were identified. Fifty-six percent of the persons identified were white, 39 percent Negro, and 5 percent other races. Sixty-two percent of the assailants had prior arrests, and 50 percent had been previously convicted.

Twenty-four percent had prior arrests for violent types of crime such as murder, forcible rape, armed robbery, aggravated assault, etc. Forty-five percent had been granted parole or probation following convictions for prior criminal charges, and 23 percent were on parole or probation at the time of the police killing in which they were involved. Nine percent of the persons identified had a prior arrest for a narcotics charge, and an additional 9 percent had prior arrests for police assault. Ninety-four percent were male and 6 percent were female.

Prior arrest for crime of violence	562	36	343	41	219	30
Convicted on criminal charges—granted leniency	573	36	287	34	286	39
On parole or probation at time of killing	251	16	123	15	128	17
Arrested on prior murder charge	66	4	34	4	32	4
Prior arrest on narcotic drug law violation	260	17	143	17	117	16
Prior arrest for assaulting policeman or resisting arrest	129	8	94	11	35	5
Prior arrest for weapons violation	337	21	190	23	147	20

In 1978, 14 offenders were justifiably killed at the scene of the police killing or in ensuing confrontations. Three of these assailants were killed by victim officers. Eight offenders were wounded by victim officers, and 1 offender committed suicide.

The persons identified ranged in age from 13 to 56. The average age of these individuals was 26 years. Sixty-two percent were between the ages of 18 and 30, and 8 percent (10) were under the age of 18.

In the period 1967-1976, the most recent 10-year period for which complete disposition data are available, 1,525 known persons were involved in connection with the killing of 1,077 law enforcement officers. Of these known offenders, 1,272 were arrested and charged in connection with the killings of the officers. Available court disposition data regarding the offenders found guilty of the officers' murders disclosed that 113 offenders were sentenced to death, 403 were sentenced to life imprisonment, 260 received prison terms ranging from 1 to 2,001

years, 4 offenders received probation, and 1 received a suspended sentence. Sentences for 14 offenders who were found guilty are unknown.

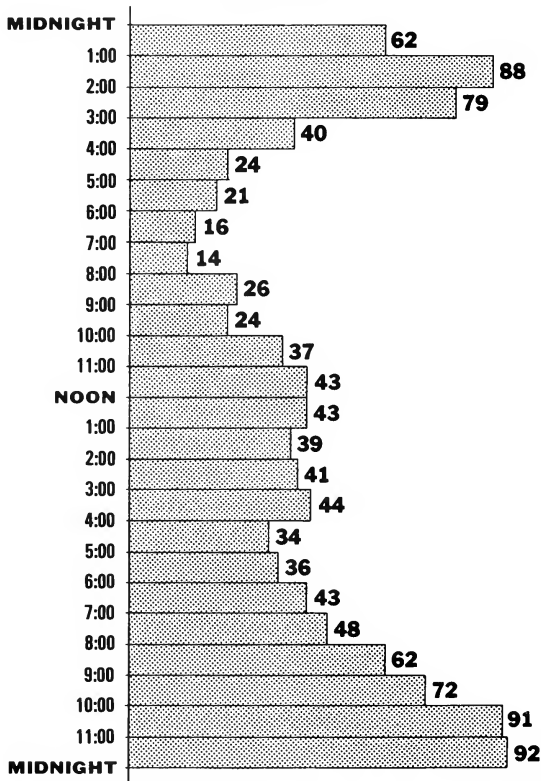

Disposition of Persons Identified in the Killing of Law Enforcement Officers, 1967-1976

	Total	Percent distribution
Known persons	1,525	100
Fugitives	16	1
Justifiably killed	196	13
Committed suicide	41	3
Arrested and charged	1,272	83
Arrested and charged	1,272	100
Guilty of murder	795	63
Guilty of lesser offense related to murder	103	8
Guilty of crime other than murder	98	8
Acquitted or otherwise dismissed	167	13
Committed to mental institution	42	3
Case pending	52	4
Died in custody	15	1

LAW ENFORCEMENT OFFICERS KILLED

Hour of Day

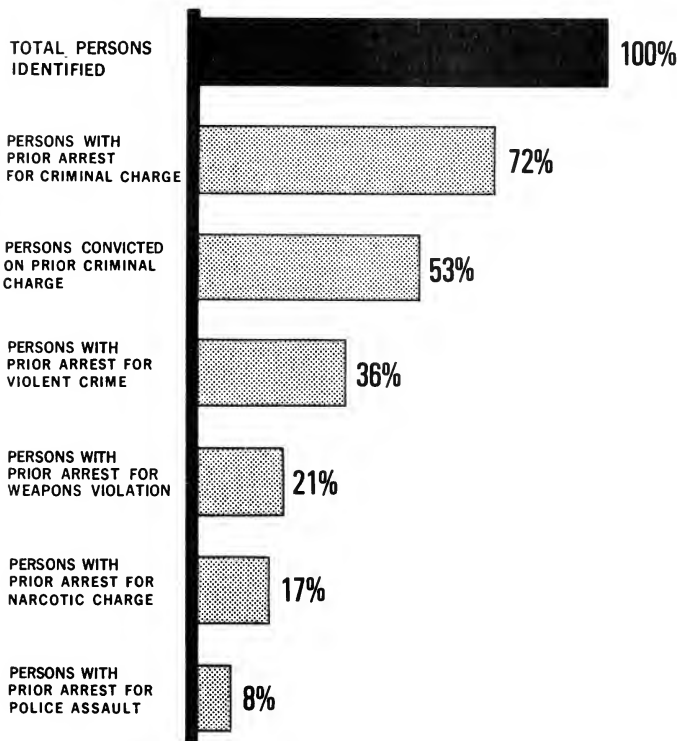

1969-1978

The hour of the day in which four officers were killed is not known.

CRIMINAL HISTORY OF 1,573 PERSONS IDENTIFIED IN THE KILLING OF LAW ENFORCEMENT OFFICERS

PERCENT OF TOTAL PERSONS IDENTIFIED
1969-1978

SECTION VI

APPENDIX I

TABLE METHODOLOGY

This appendix is to assist the reader in understanding the tables presented in this publication. By utilizing the following key, the reader will gain a better understanding of table construction.

Key: A) Column 1 shows the table number. This appendix will refer to Tables 1 through 54, *Crime in the United States—1978*.

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of agency participation.

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publica-

tion employ statistics from one or more of the above-listed participation levels. For example, Table 1 includes all three agency reporting levels, but Table 14 presents only the data from agencies having reported for the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1978).	Statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1978, estimations. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1978.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1978 statistics are consistent with Table 1, <i>Crime in the U.S.</i> Pre-1978 crime statistics have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1978. Population statistics represent July 1 estimations for each year except April 1, 1970. The tabular breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the 10th place for violent crime and 100th place for property crime.	Represents an estimation of national reported crime activity from 1969 to 1978.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1978 statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1978. Population statistics represent July 1 estimations for each year. The tabular breakdowns are according to UCR crime definitions (App. II).	Represents estimation of reported crime activity for all Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1978).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1978, population estimations. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents estimation of reported crime activity for all Index offenses at state level. Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1978).	Statistics are published for all Standard Metropolitan Statistical Areas (SMSAs) having at least 75% reporting. Figures are listed for central cities of the SMSAs if the cities submitted 12 months data in 1978. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1978. Population statistics represent July 1, 1978, estimations. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents estimation of the reported crime activity for all Index offenses at individual SMSA level. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
6	All law enforcement agencies submitting complete reports for all months in 1978.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The population classification of agencies is based on July 1, 1978, population estimations of each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparisons of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for all months in 1978.	Student enrollment figures are adjusted by converting part-time students into full-time equivalents (FTEs) as provided by the National Center for Education Statistics of the U.S. Department of Health, Education, and Welfare. FTEs are computed by taking the fraction of part-time students by the prescribed method in the "Higher Education General Information Survey (HEGIS XII)."	Represents reported crime and FTEs of individual university/college law enforcement agencies listed alphabetically by state. Totals are supplied for violent and property crimes.
8	All law enforcement agencies submitting complete reports for all months in 1978.	"Suburban Counties" are defined to be the area covered by all noncity agencies within an SMSA (App. III).	Represents crime reported to individual police agencies in suburban counties. Any comparison of UCR statistics should take into consideration demographic differences.
9	All law enforcement agencies submitting complete reports for all months in 1978.	"Rural Counties" are those outside SMSAs and not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1978, population estimations of individual agencies.	Represents crime reported to individual police agencies in rural counties over 25,000 population. Any comparison of UCR statistics should take into consideration demographic differences.
10, 11, 12, 13	All law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	The 1978 crime trend statistics are 1-year comparisons based on 1978 reported crime activity. Only common reported months for individual agencies are included in 1978 trend calculations. Populations represent July 1, 1978, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban Cities" represents all city agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14, 15, 16, 17	All law enforcement agencies submitting complete reports for all months in 1978.	The 1978 crime rates are the ratios of the aggregated 1978 crime volumes and the aggregated 1978 populations of the contributing agencies. Population statistics represent July 1, 1978, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban" represents all city agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1978.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1977 and 1978.	Aggravated assault is excluded from the table because, for UCR Program purposes, if money or property is taken in connection with the assault the offense becomes a robbery.
20, 21, 22, 23	All law enforcement agencies submitting complete reports for at least 6 months in 1978.	The 1978 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1978. Population statistics represent July 1, 1978, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
24	All law enforcement agencies submitting complete reports for at least 6 months in 1978.	<p>The arrest totals presented are national estimates based on the arrest statistics of agencies reporting at least 6 months in 1978. A corresponding population is used when 6 through 11 months are used. The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 25) divided by the percent of total group population reporting (as estimated for July 1, 1978).</p> <p>For example, in the Rural Area, agencies having reported 6 or more months represent 46,208 burglary arrests and 88.1% of the total rural population. The rural burglary arrest total is estimated to be:</p> $\frac{\text{Reported volume}}{\% \text{ population}} \times 100$ $\frac{46,208}{88.1} \times 100 = 52,449$	
25	All law enforcement agencies submitting at least 6 months in 1978.	The 1978 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1978 reported arrest statistics and equivalent population. The population statistics represent the July 1, 1978, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
26, 27	All law enforcement agencies submitting annual reports in 1969 and all months in 1978.	The arrest trends are the percentage differences between 1969 and 1978 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1978, estimations.	
28, 29	All law enforcement agencies submitting complete reports for at least 6 common months in 1974 and 1978.	The arrest trends are the percentage differences between 1974 and 1978 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1978, estimations for individual agencies.	
30, 31	All law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	The arrest trends are 1-year comparisons between 1977 and 1978 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1978, estimations of individual agencies.	
32, 33, 34, 35	All law enforcement agencies submitting complete reports for at least 6 months in 1978.		Slight decrease in coverage for Table 35 due to editing procedure and lower submission of race data.
36	All city law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	The 1978 city arrest trends represent the percentage differences between 1977 and 1978 arrest volumes aggregated from common city agencies. "City agencies" are defined to be all agencies within Population Groups I-VI (App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
37, 38, 39	All city law enforcement agencies submitting reports for at least 6 months in 1978.	"City agencies" are defined to be agencies within Population Groups I-VI (App. III).	
40	All city law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	The 1978 city arrest trends represent the percentage differences between 1977 and 1978 arrest volumes aggregated from common city agencies. "City agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41	All city law enforcement agencies submitting complete reports for at least 6 months in 1978.	"City agencies" are defined to be agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 41 due to editing procedure and lower submission of race data.
42, 46	All suburban law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	1978 suburban arrest trends represent percentage differences between 1977 and 1978 arrest volumes aggregated from contributing agencies. "Suburban area" is defined to be all counties and cities with fewer than 50,000 inhabitants within SMSAs (App. III).	
43, 44, 45, 47	All suburban law enforcement agencies submitting reports for at least 6 months in 1978.	"Suburban area" is defined to be counties and cities with less than 50,000 population within SMSAs (App. III).	Slight decrease in coverage for Table 47 due to editing procedure and lower submission of race data.
48, 52	All rural law enforcement agencies submitting complete reports for at least 6 common months in 1977 and 1978.	1978 rural trends represent percentage differences between 1977 and 1978 volumes aggregated from contributing agencies. "Rural area" is defined to be all noncity agencies outside SMSAs (App. III).	
49, 50, 51, 53	All rural law enforcement agencies submitting complete reports for at least 6 months in 1978.	"Rural area" is defined to be noncity agencies outside SMSAs (App. III).	Slight decrease in coverage for Table 53 due to editing procedure and lower submission of race data.
54	All law enforcement agencies submitting complete reports for at least 6 months in 1978.	Population statistics represent July 1, 1978, estimations of individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II offenses. Offense and arrest information are reported for the Part I offenses on a monthly basis, whereas only arrest information is reported for Part II offenses.

The Part I offenses are as follows:

1. **Criminal homicide.**—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. **Forcible rape.**—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

3. **Robbery.**—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

4. **Aggravated assault.**—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. **Burglary—breaking or entering.**—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. **Larceny—theft (except motor vehicle theft).**—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. **Motor vehicle theft.**—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

The Part II offenses are:

8. **Other assaults (simple).**—Assaults or attempted assaults where no weapon was used or which did not result in serious or aggravated injury to the victim.

9. **Arson.**¹—Any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

10. **Forgery and counterfeiting.**—Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. **Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks except forgeries and counterfeiting.

12. **Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property, including attempts.

¹In October, 1978, arson was designated as a Part I crime. However, data collection did not commence until 1979.

14. **Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

15. **Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

16. **Prostitution and commercialized vice.**—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

18. **Drug abuse violations.**—State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

19. **Gambling.**—Promoting, permitting, or engaging in illegal gambling.

20. **Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**—State or local liquor law violations, except “drunkenness” (offense 23) and “driving under the influence” (offense 21). Federal violations are excluded.

23. **Drunkenness.**—Drunkenness or intoxication. Excluded is “driving under the influence” (offense 21).

24. **Disorderly conduct.**—Breach of the peace.

25. **Vagrancy.**—Vagabondage, begging, loitering, etc.

26. **All other offenses.**—All violations of state or local laws, except offenses 1–25 and traffic offenses.

27. **Suspicion.**—No specific offense; suspect released without formal charges being placed.

28. **Curfew and loitering laws.**—Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. **Runaway.**—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

UNIFORM CRIME REPORTING AREA DEFINITIONS

The geographic presentation of Uniform Crime Reporting (UCR) data consistently relies on the concept of the Standard Metropolitan Statistical Area (SMSA). Comprehension of this term is crucial to understanding the related UCR concepts of "Other Cities" and "Rural Area" to be discussed later in this appendix.

Standard Metropolitan Statistical Areas (SMSAs)

A Standard Metropolitan Statistical Area (SMSA) is a statistical construct used to define metropolitan areas in a uniform manner. It is an integrated economic and social unit with a recognized large population nucleus. The SMSA concept was developed to facilitate the analysis and dissemination of statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal statistical agencies to utilize the same boundaries when publishing statistical data.

An SMSA always includes a central city (cities) of specified population (generally over 50,000) and the county (counties) in which it is located. In addition, an SMSA also includes contiguous counties when the economic and social relationship between the central and contiguous counties meet specified criteria of metropolitan character and integration. An SMSA may cross state lines. In New England, SMSAs are composed of cities and towns instead of counties.

The Office of Federal Statistical Policy and Standards of the U. S. Department of Commerce has responsibility for designating and defining SMSAs. It in turn is advised by the Federal Committee on Standard Metropolitan Statistical Areas. The detailed criteria followed in establishing and defining SMSAs are presented in the U. S. Department of Commerce publication, *Standard Metropolitan Statistical Areas*, revised edition 1975. These criteria are outlined below.

1. Each SMSA must include at least:

- (a) One city with 50,000 or more inhabitants, or
- (b) A city with at least 25,000 inhabitants,

which, together with those contiguous places (incorporated or unincorporated) having population densities of at least 1,000 persons per square mile, has a combined population of 50,000 and constitutes for general economic and social purposes a single community, provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000.

2. A contiguous county will be included in an SMSA if
 - (a) at least 75% of the resident labor force in the county is in the nonagricultural labor force, and
 - (b) at least 30% of the employed workers living in the county work in the central county or counties of the area.
3. A contiguous county which does not meet the requirements of criterion 2 will be included in an SMSA if at least 75% of the resident labor force is in the nonagricultural labor force and it meets two of the following additional criteria of metropolitan character and one of the following criteria of integration.
 - (a) Criteria of metropolitan character.
 - (1) At least 25% of the population is urban.
 - (2) The county had an increase of at least 15% in total population during the period covered by the two most recent Censuses of Population.
 - (3) The county has a population density of at least 50 persons per square mile.
 - (b) Criteria of integration.
 - (1) At least 15% of the employed workers living in the county work in the central county or counties of

- the area, or
- (2) The number of people working in the county who live in the central county or counties of the area is equal to at least 15% of the employed workers living in the county, or
 - (3) The sum of the number of workers commuting to and from the central county or counties is equal to 20% of the employed workers living in the county.

Community Types

Uniform Crime Reporting data are often presented using three community type aggregations. These are SMSA, Other Cities, and Rural Area.

The concept of SMSA was explained in the preceding paragraphs. SMSAs as used in this publication made up approximately 73 percent of the total United States' population in 1978. A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the SMSA. Suburban areas therefore can be subdivided into suburban cities and suburban counties.

Other Cities are those outside SMSAs. Most of these places are incorporated and comprised 12 percent of the 1978 population of the United States.

A Rural Area is that portion of a county outside the SMSA excluding areas covered by city police agencies. For crime reporting purposes, rural areas are made up of unincorporated portions of counties outside urban places and SMSAs. They comprised 15 percent of the 1978 national population.

The following diagram illustrates the aforementioned discussion of the community types.¹

	SMSA	NON-SMSA
CITIES	CITIES OVER 50,000	OTHER CITIES
	SUBURBAN CITIES	
COUNTIES (unincorporated area)	SUBURBAN COUNTIES	RURAL AREA

Population Groups

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population

¹In New England, "town" instead of "county" is used to describe SMSAs. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic

group classifications used by the UCR Program are as follows:

Population Group	Political Label	Population Range
I	City	250,000 and Over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural Area)	County	N/A
IX (Suburban County) ...	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. The following table shows the number of UCR contributing agencies within each population group for 1978:

Population Group	Number of Agencies	Population Covered
I	57	41,340,000
II	117	16,862,000
III	282	19,253,000
IV	666	22,779,000
V	1,620	25,146,000
VI	7,311	24,034,000
VIII (Rural Area)	3,632	32,786,000
IX (Suburban County) ...	1,350	35,859,000

Total	15,035	218,059,000
-------------	--------	-------------

Regions and Divisions

The United States is divided into four regions: the Northeastern States, the North Central States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

areas are used in tabulations for New England since they encompass an entire county or counties.

NORTH CENTRAL STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic *	East South Central
Delaware	Alabama
Florida	Kentucky
Georgia	Mississippi
Maryland	Tennessee
North Carolina	West South Central
South Carolina	Arkansas
Virginia	Louisiana
West Virginia	Oklahoma
	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

*Includes District of Columbia.
